BRILLIANT IN WATER

POLLET WATER GROUP

OUR MISSION

In our more than 15 years of existence, SUKO has become the biggest distributor of both Clack Corp. and Water Right Inc. in Europe, Middle East and Africa. It is our mission to supply valves, components, filter media and total solutions that meet customers' expectations. SUKO wants to be best in class in stock-holding, accurate and reliable service and technical support to our customers worldwide. SUKO sells its quality products only to professional water treatment companies and is also distributing through her sister companies of the Pollet Water Group where we are part of.

VALVES

SUKO is distributor of Clack and Water-Right valves for Europe, Africa and the Middle-East. With a large stock of valves and accessories we can fulfil the growing demand from the market for these excellent valves. The Water-Right valves are creating a personalized line of products with more advanced electronics.

SOLUTIONS

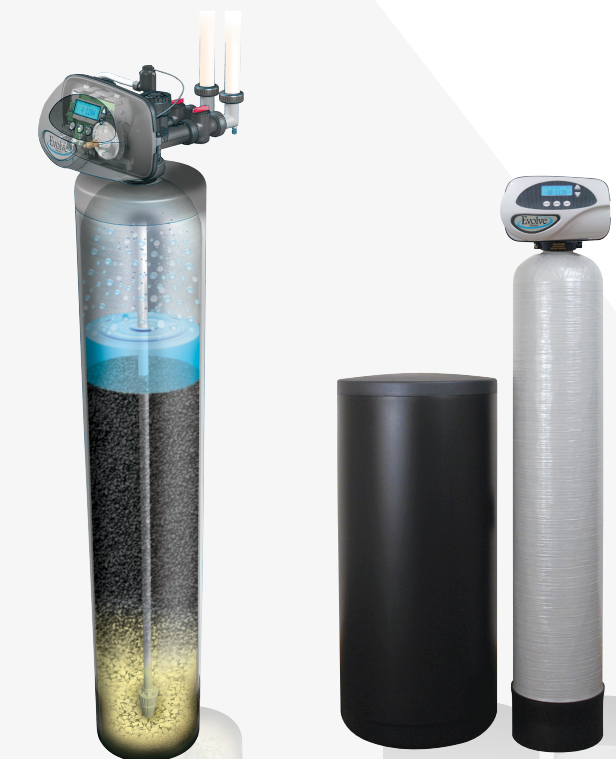

SUKO distributes complete water treatments units for city and well water applications. Our Evolve Series with Crystal Right medium or Evolve Series Air with Birm or Centaur give you the right solution for all problem waters.

Evolve Series Crystal Right

Crystal-Right is a zeolite that can soften, remove iron, manganese and small amounts of H₂S. It also absorbs ammonia and elevates pH. Crystal-Right can also filter organic contaminants and capture insoluble inorganic.

Evolve Series Air

Air Filters remove high levels of sulfur and iron commonly found in well water anywhere. The water is immediately oxidized in the tank due to our unique aeration system.

”

Well water or city water?
Our SOLUTIONS make
it better.

FILTER MEDIA

SUKO distributes all media from Clack and Mineral Right. Our exclusive Crystal-Right minerals are a unique synthetic zeolite, used to remove iron, manganese and hardness from well water by ion exchange. At the same time the mineral can also remove ammonia and correct the pH. The Crystal-Right minerals are regenerated with salt.

”

We distribute and stock
a complete line of
FILTER MEDIA.

”

We supply valves,
components, filter
media & total
solutions

”

We offer a complete line of
VALVES, unique features to
